Professional Profile

- As a seasoned full-stack developer, I've built a career on delivering reliable and efficient solutions. With a strong foundation in developing scalable web applications using Node.js, Express.js, and MongoDB, I've successfully tackled complex projects. However, my passion for cybersecurity has driven me to expand my expertise, recognizing the critical need to protect sensitive information and stay ahead of emerging threats. To achieve this goal, I've honed my technical skills in Linux commands, network hardening, and security audits. Additionally, my familiarity with NIST-CSF core functions and Google Cloud Security has provided a solid foundation in security best practices. I'm now excited to apply my combined skills in development and cybersecurity to protect high-traffic web applications and systems from ever-evolving cyber threats.

Skills

- Programming languages: JavaScript, HTML, CSS
- Cybersecurity frameworks and tools: NIST-CSF, Google Cloud Security.
- Operating Systems: Linux, Windows
- Networking fundamentals: TCP/IP, DNS, DHCP
- Familiarity with security best practices, threat analysis, and incident response.
- Linux commands and permissions management.
- Web development frameworks: Node.js, Express.js, MongoDB, React.
- Analytical and problem-solving skills.
- Effective communication and collaboration skills.

Experience

- Google Cybersecurity Course** July 2024 - Present
Cybersecurity Training and Projects
 - Utilized Linux commands to manage permissions on systems and files, ensuring access was properly restricted and sensitive data was protected.
 - Conducted comprehensive security audits and incident response initiatives, leveraging NIST-CSF core functions to identify vulnerabilities and implement effective countermeasures.
 - Implemented network hardening processes to bolster system defenses and reported security findings to stakeholders.
 - Developed a strong foundation in security operations, threat analysis, and incident response, essential skills for navigating the ever-evolving cybersecurity landscape.
- HaitianMeet** January 2024 - June 2024
Full Stack Developer
 - Crafted scalable web applications with object-oriented programming principles
 - Implemented robust authentication and authorization mechanisms using JSON Web Tokens (JWT)
 - Collaborated seamlessly with cross-functional teams using Git and GitHub for version control
 - Designed intuitive RESTful APIs to facilitate efficient communication between frontend and backend systems
 - Streamlined file uploads with Multer to enhance overall application performance
- Gomy Code** March 2023 - August 2023
Full Stack Developer (Graduate)
 - Developed scalable database API applications and servers supporting high-traffic websites
 - Collaborated with fellow developers using version control systems like GitHub
 - Designed and developed web applications using React, Node.js, Express.js, and MongoDB

Education

- Google Cybersecurity Course** (in view)
Certificate in Cybersecurity
- GomyCode** 2023
Full Stack Development
- University of Benin, Nigeria** 2019
Bachelor of Science in Business Administration

Interests

- Cybersecurity strategy and innovation, threat analysis, security architecture, and staying ahead of the ever-evolving threat landscape.

Languages

- English
- Igbo
